

RIT Observatory Log

Date: 2/20/22 Name: Michaela Cohen

mrc9993@rit.edu

Time	Target	Filter	Exp N	comments
5:05 pm				opened dome
5:30 pm				removed electric focuser — detector too heavy from telescope
5:45 pm				telescope → 2 in - to 1.25 → 1/4 adaptor installed on camera
5:47 pm				telescope adaptor removed from detector and installed onto telescope
5:49 pm				detector installed onto telescope
5:51 pm				detector removed from telescope and removed filters/adaptor
5:54 pm				detector installed onto telescope, orienting dome to face more towards zenith
5:57 pm				telescope uncovered
6:03 pm				data acquisition, light intensity dropping fast
6:07 pm				detector has slipped about 2mm
6:10 pm				did not mark well 4,000 ^{5,000} intensity from 6:06-6:10 2160 DN
6:15 pm				160 @ 6:15 PN
6:25 pm				two stars found on tv — "integrating"
